CHANDRASHEKHARA SHIVACHARYA VM

Bengaluru, KA | +91 9902732389 | chandrashekharashivacharya18@gmail.com |
LinkedIn | My-Portfolio

SUMMARY

Software Developer with core competencies in Full Stack Development, Java frameworks, and Python architectures. Adept at building scalable web systems, deploying machine learning algorithms, and configuring cloud infrastructure. Competent in translating technical requirements into high-performance, responsive software applications.

TECHNICAL SKILLS

- **Programming Languages:** Python, C, Java, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** Django, Spring Boot, React.js, Flask
- **Databases & Data Management:** MongoDB, Relational Databases, Structured Data Frameworks
- **DevOps & Cloud Computing:** Git, GitHub, Docker, Google Cloud Platform (GCP Compute Engine)
- **Developer Tools & Software:** VS Code, Eclipse, IntelliJ IDEA
- **Operating Systems & Systems:** Linux Environment, Windows Architecture, Network Systems

WORK EXPERIENCE

Karunadu Technologies Pvt Ltd Bengaluru, KA

Software Engineering Intern (Python & Applied Machine Learning) Feb 2026 – May 2026

- Engineered and deployed 2 data-driven machine learning applications using Python to automate backend system workflows, replacing manual verification processes completely for 100% data coverage.
- Processed high-dimensional datasets containing over 50,000 data points using predictive modeling techniques, minimizing computing resource overhead and improving runtime efficiency by 15%.
- Maintained clean code standards following strict formatting guidelines and collaborated directly with 4 engineering teams to systematically refactor 12 legacy software modules.
- Conducted 3 complete unit testing and debugging cycles across backend services to ensure seamless integration with client-facing user interfaces.

PROJECTS

NIRMAAN-AI: Construction Progress Monitoring System

- Developed a comprehensive AI-powered monitoring application utilizing computer vision frameworks for automated tracking, increasing status compilation speeds by 30%.
- Integrated YOLO object detection algorithms with custom Convolutional Networks to ingest and process high-volume live visual data streams across 5 test environments.
- Engineered a hybrid neural network model combining visual data with system metrics to predict project scheduling delays with a verified 94% accuracy rate.
- Optimized core image processing pipelines to lower server-side compute times by 25%, enabling faster generation of automated progress tracking reports.

Project Hub – E-Commerce Marketplace Platform — Live Demo

- Architected a full-stack project marketplace application tailored to 3 distinct client demands to streamline the commercialization of digital software assets.
- Built a responsive UI web application using Python and Django, reducing structural API endpoint latency by 20% via optimized database query structures.
- Deployed the cloud application infrastructure live on Render, configuring deployment hooks to maintain a strict 99.9% system availability benchmark.
- Developed a robust database schema using structured data tools to cleanly map dynamic updates for 100+ active inventory records and user transaction logs.

EDUCATION

Acharya Institute of Technology Bengaluru,
Bachelor of Technology in Computer Science and Engineering (GPA: 7.91/10) Nov 2023 – Jun 2026

Government Polytechnic Hosadurga Hosadurga,
Diploma in Engineering in Computer Science and Engineering (GPA: 9.4/10) May 2020 – Jun 2023

CERTIFICATIONS

- Developing Frontend-Backend Apps with React – IBM
- Spring Boot Framework Architecture – Infosys Springboard
- Advanced Java Training Pathway – LinkedIn Learning
- Full Stack Development Certification
- Python Programming with Machine Learning Specialization
